CROSSFIELD

Chicken Supper and Hop Friday, November 4th.

All roads lead to the East Community Hall on Friday night of this week, when the Floral Local U. F. W. A. will hold their annual chicken supper followed by a dance. Supper will be served from six to eight o'clock. The Melody Boys will furnish the music for the dance. If you care to enjoy a real chicken supper with all the trimmings, and then to dance to good music, just follow the crowd on Friday evening.

Board of Trade Notes

In due consideration of the coming of the Bishop of Calgary on Thursday, Nov. 17th to address the Board of Trade, the Publicity and Entertainment Committees have decided to sell tickets in advance. Tickets may be obtained at McClelland's Drug Store or from the Secretary of the Board of Trade.

The Women's Guild are serving the lunch, which commences at 6:30 p. m.

No School Concert This Year

This was the conclusion arrived at by the Crossfield teaching staff as a result of the questionnaire sent to each family having children attending the school.

D. L. Tweedle, Principal.

Collicutt & Son Make Clean Sweep of Hereford Championships

Collicutt & Son, Crossfield, made a clean sweep of the championships in the Hereford division at Calgary's annual fall show on Wednesday.

SETTING THEM UP

Village Constable Belshaw rounded up a number of the boys who had put the "parliament buildings" on Main Street on Hallowe'en night, and made them take them back to their respective places. The (can) brigade were not as joyful as on the night before.

TWO COPS AT CARSTAIRS

The Village Council of Carstairs have now two Constables on duty at night instead of one as heretofore.

SNEAK THIEF GOT \$20.00

A sneak thief got away with around \$20.00 the contents of the Carstairs Butcher Shop till on Monday. Mr. Boucock had stepped out for a few minutes and did not lock the back door, which was evidently just what some one was waiting for.

LOCAL NEWS

Wm. Wood has built a small addition to his house on Osler Street. Mrs. Robt. Arnott is an Edmonton visitor this week.

T. M. Mair, Everett Bills, and O. E. Coffin are in Calgary today attending the annual Stock Sale.

Mr. W. Willis, sr. is spending a few days in town renewing acquaintances.

The One Cent Sale is now in full swing at McClelland's Drug Store. Wonderful bargains are to be had. Don't miss it.

The many friends of Mrs. D. K. Fike will regret to learn that she is critically ill at her home here. Mrs. Fike suffered a paralytic stroke some months ago.

Adam Cruickshank, Frank Brown, Lake Parsons, Dannie Parsons, and Don McArthur left on Monday to hunt big game in the vicinity of Rocky Mountain House.

Bill Gilson and Cal Calhoun left on Monday for the west country. Bill is out to get a load of wood, while Cal expects to knock down a deer or a moose.

Clarence Casey is back on the job at the Crossfield Garage after an absence of thirty days, during which time he has been running a threshing outfit.

PUBLIC MEETING TUESDAY, NOV. 8

R. English, Deputy Minister of Municipal Affairs, and Mr. Judge to Speak on Proposed Enlarged Municipal Units - Discussion Invited.

Mr. R. English, Deputy Minister of Municipal Affairs and Mr. Judge, official of the Municipal Department, Edmonton, will address a public meeting in the U.F.A. Hall, Crossfield, at 2:30 p. m. Tuesday, November 8th. The subject will be the "Proposed Enlarged Municipal Units."

Mr. Judge has spent over two years making a thorough survey to see what economies can be made. He will bring his maps and a thorough discussion will be invited regarding all details.

An evening meeting will be held in Balzac at 8 p. m. Everybody welcome.

FELLOWSHIP CLUB GUESTS OF CARSTAIRS CLUB

The Crossfield Fellowship Club were the guests of the Carstairs Young People's League at a social evening on Tuesday night. In spite of the storm several carloads attended. The evening was spent in games, contests and songs, followed by a very sumptuous lunch. Everyone reports a very pleasant evening.

LING GOW ING MOW

A miniature battle was staged at the Oliver Cafe on Sunday evening, as a well-known citizen started in to dust off the odd Chinaman. However he was out-numbered by three to one, and by using hot water, hot rice, and brandishing butcher knives and cleavers, he was forced to retreat.

HARRY COMES HIGH

Sir Harry Lauder, Scotch comedian, who will appear at the Grand Theatre, Calgary, on Friday and Saturday of this week, has evidently forgot that the War is over, judging by the admission prices, which run from \$2.00 to .75. Oh, oh, and wheat at less than 30c a bushel.

QUITTING BUSINESS

Steve Klejko who purchased the Crossfield Meat Market from Bert Mobbs last fall, is going out of business and is offering his stock of groceries, fresh and cured meats at prices that will move the entire stock in short order.

Crossfield Legion Prepare For Remembrance Day Activities

The regular meeting of the local branch of the Canadian Legion was held in the Town Hall on Saturday last. Comrade President Montgomery in the chair.

Minutes of last meeting were read and adopted. Reports were heard and discussed from the following committees: Relief, Dance and Smoker.

The Remembrance Day Service will be held in the United Church at 10.45 a. m. All Veterans are requested to meet at the Town Hall at 10.30 a. m. Decorations will be worn.

Comrades are reminded that they may pay their dues to any of the following Comrades; J. Crocker, F. Mossop, A. H. McMillan or P. Gravel.

Arts and Crafts

Arrangements have been completed to engage the Calgary Orchestra, "The Harmony Five," also Comrade Rhys and other artists will contribute numbers between dances.

Returned men join your Legion - "In unity is strength."

Madden Ladies Aid to Hold

Tea and Sale on Nov. 15th.

The Madden Ladies Aid met at the home of Mrs. Demmerling on Thursday, Oct. 20th, with fifteen ladies present. Mrs. Giles, president, presiding. The roll call was answered by favorite cake or cookie recipes.

It was decided to have an afternoon tea Nov. 15 at the Madden Store to sell work on hand. At the close lunch was served.

For the convenience of taxpayers in the Crossfield district, Mr. R. D. Sutherland, Secretary-Treasurer of the Municipal District of Rosebud will be at the Municipal office, Carstairs, on Friday of each week.

Lest We Forget.

Fourteen years have come and gone since that momentous eleventh hour of the eleventh day, of the eleventh month of 1918, when the armistice which ended hostilities in the greatest war in the history of mankind became effective. Once again the people of Canada observe "Remembrance Day,"—a day on which they pay tribute to the memory of the thousands of their fellow citizens, men and women, who gave their lives in a cause which to them, and to us who survive, was a sacred, a noble cause, namely, a war to end war.

But as we look back over those fourteen years, and as we view the state of the world today, we are perplexed as we seek an answer to the question: Has war, after all, been ended? We are disturbed and suffer disquietude as we contemplate the present world situation. Were the sacrifices of 1914-1918 all in vain? Is something worse to follow?

The nations of the world have not disarmed; quite the reverse is true. Armaments are greater and more deadly today than they were in July, 1914. There have been numerous attempts to reduce armaments, but none to do away with them altogether, and the attempts at reduction have been feeble and for the most part ineffective.

Under the terms of the Peace Treaty Germany was disarmed, and her allies reduced to a position of impotence for the time being. But in disarming Germany, the Allies tacitly agreed to bring about world disarmament. They have failed to do so, and now Germany is insisting on one of two things, either that the Allies proceed to disarm or that Germany be permitted to re-arm. The German demand is a reasonable one. The Allies cannot expect to hold a great, proud and powerful people in the position which the German people are forced to occupy at the present time.

What is to be the outcome? Will the Allies at last make a real, a determined, an honest attempt to disarm? If they do not, they will either have to agree to the re-arming of Germany, or that country will proceed to re-arm without their consent, and who will, or can, stop her?

But did the World War end? As a matter of fact, it is not the war still in progress, but in another form which is bringing ruin upon all nations and imposing huge and incalculable losses and intense suffering upon millions of people? The weapons now employed are not bullets and bombs and bayonets, but extreme nationalist policies of many kinds,—restrictive trade measures, prohibitive tariffs, trade quotas, immigration quotas, with each nation striving to promote its own interests by working some harm to other nations. Where do we find two nations working in cordial co-operation to advance, not only their own welfare but the welfare of each other, and the world at large? Rather, are not the nations engaged in waging war upon each other actuated solely by the motive of the survival of the fittest?

Narrow nationalism kept alive, and in turn keeping alive, racial and religious suspicions, passions and bitterness, and today, with every nation excusing its own selfishness, its own narrowness and bigotry, on the ground that other nations started it, are worse than they are, and that they are merely providing needed self-protection for themselves.

So we find Russia, while teaching its farmers and workers how to build and use tractors, at the same time instructing them in the mechanism and operation of tanks for use in war. We find democracy overthrown in Italy and a war-like dictatorship set up. Fearing each other the countries of Europe adopt policies the result of which is ruin to the agriculturists of Canada, the United States, and all of the great food exporting countries of the world. The United States and France grab the gold in the world and store it away in vaults indifferent to the fact that thereby they bring financial chaos upon the world. Each nation is out to kill the trade of all other nations, and they have succeeded to the extent that tens of millions of men and women are thrown out of work.

It is a disheartening picture, and no one nation seems to have the courage to face it, grapple with it, make a break in the vicious circle, and attempt to cut the cords which are throttling and strangling mankind. Instead, the old, threadbare excuse is given and acted upon,—the other fellow is doing it, he is to blame, and I must follow suit or be submerged.

If this attitude is maintained much longer complete world collapse is inevitable. Conditions resulting are nothing but a hotbed in which anarchy thrives and grows apace. All the enemies of law and order, all the fanatics with pet but unsound theories of their own, are preying upon the public in all countries, promising to create utopias if the people will only arise en masse and destroy everything now existing and which has been built up out of the labor, the experience, the sufferings of the generations of the past.

It is the whole system that is wrong, so these agitators declaim, but nothing is quite so wrong as such statements. It is not the system that is wrong, although like all systems it must constantly change and improve in an ever-changing world to meet conditions as they, too, change. No, the fault lies in the hearts and minds of people themselves. They still maintain their old suspicions and dislike of each other; they hate any race and language but their own; they scorn any religion but their own; each nation suffers either from fear or a superiority complex because one or the other is the predominant trait of character of the individual men and women who make up the nation. It is the individual view which finds expression in lurid national policies.

Many of the politicians and statesmen of the world, the men chosen to direct national and international policies, realize the situation and left to themselves would be able to accomplish much to remedy it and remove the danger which is imminent, but their people will not support them; the masses would sweep them aside and put others in their place to continue to insist upon policies of extreme narrow nationalism. It is their own suffering they are thus determined to maintain, and their ultimate undoing which they will bring about, unthinkingly, heedlessly, and from purely selfish motives.

New Source Of Revenue

Enterprising saleswomen of London, England, combined pleasure with business this year by loading their cars with dresses and lingerie, which they sold to people in the rural districts during vacation trips. Two titled girls who started on a tour through Yorkshire sold out their stock within a week.

Easy To Figure Out

"I suppose, like many other husbands you can't say what your wife pays for her hats and dresses." "Oh, yes, I can—too much." "But joking aside, have you ever stopped to figure out how much your wife's clothes cost you?" "It isn't necessary. I simply add my income to what I owe."

All Her Children Were Troubled With Diarrhoea

M. J. J. Bickert, R.R. 1, Enderby, B.C., writes:—"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

British Scientists Make Remarkable Discovery

Find Caterpillars Cause Of River Waters Turning Black

A remarkable discovery was made by British scientists in the Eden-bridge and Oxted district of Kent and Surrey recently. Quite unaccountably, the waterways in this area were rapidly being turned black, and it was alleged that pollution from sewage farms was the cause.

As a result, the department of botany of the British Museum was invited to probe the mystery. Samples of water were taken from the streams at various points and analyzed, when the sewage farms were exonerated, as the same ingredients were present both above and below the outfalls.

It was then noticed that paths and roadsides along the stream, were thickly covered with oak trees, were thickly covered with a sooty material consisting of partially digested leaves which had been devoured by millions of caterpillars of the green oak moth.

By a very odd coincidence, this substance, washed down by natural drainage, had combined chemically with certain salts in the stream water, and the result was the manufacture of a natural ink.

This insect is quite capable of destroying an oak forest, but fortunately, there is a natural check in the shape of a headless fly known as the apple, or little hawk fly, which preys on the adult moths and is thus of immense value in saving thousands of pounds worth of native timber.—Tit-Bits.

World's Grain Show

British Empire Farmers' Co-Operative To Show At Regina

The Empire Farmers' Co-Operative, Limited, will be represented both by exhibit space and by delegates to the world's grain exhibition and conference opening at Regina in July next, according to a cablegram received at headquarters' office of the exhibition and conference.

The Right Hon. Lord Strathguy, chairman, who with two of the directors will attend as delegates, expressed the opinion that an excellent opportunity is thus provided to meet, to confer with, and to present the scope and advantages of the Empire Farmers' Co-Operative to farmers of all parts of the Empire. Exhibit space in the new grain show building has been booked for the organization.

This will be used for the presentation of such matters as may be of interest to farmers and for convenient distribution of literature.

Technical Education

Explains Delay In Giving Effect To Vocational Act

"Some delay has occurred in bringing the Vocational and Technical Education Act into effect by reason of the fact that the necessary regulations governing the act are still under consideration by the government," reads the communication explaining the status of this legislation from Hon. W. A. Gordon, Minister of Labor, tabled in the House of Commons. The letter was dated last March, and was in answer to protest from the Alberta School Trustees' Association against the delay in giving effect to this 1931 legislation.

Cost Of Direct Relief

Per Capita Cost In Regina Is Given As \$7.90

The per capita cost of direct relief in Regina during the period from May, 1931, to April, 1932, for food, clothing and shelter, was \$7.90, according to information given recently by Hon. J. A. Merkle, Minister of Labor.

This figure which represent an expenditure of \$420,566.53, does not include administration costs, drugs, medical attention or railway fares.

An Old For All Men—The sailor, the soldier, the fisherman, the lumberman, the outdoor laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, soothe lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

When the Chinese New Year comes around, the Chinese make a point of paying their debts. Do they need further civilization?

At 452 degrees below zero some of the metals, such as silver and copper, lose their resistance to electricity and become super-conductors.

Boxing matches and motion pictures are now the preferred types of amusement in Paris.

Barley In Export Trade

Production Now Amounts To Nearly 150,000,000 Bushels a Year

The production of barley in Canada is rapidly increasing and now amounts to nearly 150,000,000 bushels a year. The principal uses for barley in the export market are: Feed for Livestock; Pot and Pearl Barley; Rolled Barley; Barley Flour and Barley Meal; Breakfast Foods; Malt Food Products; Malt Coffee and Barley Coffee; Malt Flour; Malt Extract; Fermented Alcoholic and Non-Alcoholic Beverages; Distilled Alcoholic Beverages and Solvents; Industrial Alcohol; Malted Stock Food; and Yeast.

A special study of the particular needs of that section of the market which the producer seeks to serve, is essential to the satisfactory development of the export trade.—Department of Agriculture, Ottawa.

Street Named After Canadian Captain

One Of Churchill's Thoroughfares Will Be Called Brevier

One of the streets of the new townsite to be opened at Churchill next spring has been named after a living Canadian, Captain J. E. Brevier of Lewis, Que. He is the only Canadian now alive to be given this recognition in the building of Canada's new northern port on Hudson Bay. All the other streets have been named after explorers and navigators of the north lands long since departed.

Worms, by the irritation that they cause in the stomach and intestines, deprive infants of the nourishment that should derive from food, and mal-nutrition is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutrition of the child is assured and development in every way encouraged.

Trinkets Belonging To Edgar Wallace Sold

Several Things In Collection Bought By Late Author's Wife

A collection of jewelry which belonged to the late Edgar Wallace, novelist, brought in a total of \$1,250 in London. The sale was "by order of the receiver, Edgar Wallace administration." Mrs. Edgar Wallace bought several of the items for members of the family. An engraved gold cigarette case weighing about seven ounces brought \$175. A suite of cashmere and diamond square sleeve links and two studs sold for \$400 and a platinum watch for \$105.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Have British Captains

Ninety per cent. of all Chinese ships have British captains and most of them are British registry with the union jack painted all over the side to warn pirates away.

Douglas Egyptian Liniment is unrivaled for speedy relief in muscular rheumatism, lame back, inflammation, burns and felons.

Here's to the man who plans things—Builds things—makes things; Who prattles not of wonders of old Nor glories over ancestral gold, But takes off his coat and takes hold And does things?

When you stop growing at both ends and start in the middle you are an adult.

Life Is Dedicated To War Memorial

Book Of Remembrance To Be Illuminated By Montreal Man

A five-year task of illuminating the Book of Remembrance which will contain the names of the 68,000 Canadian men and women who died overseas from August 1914 until the disbandment of the Canadian Expeditionary Force in 1923 is the life-work of William Purves, who exhibited a rough sample of the proposed Book in the McGill University Library here. The completed work will be placed in a specially-built vault in the Peace Memorial Tower in the Parliament Buildings at Ottawa.

"The work I am now engaged on is my life-work," said Mr. Purves when interviewed. "If I live the next five years to finish the job I shall feel that my life has not been spent in vain."

The Book of Remembrance containing 450 leaves of the finest calf-skin vellum will be bound in purple Morocco leather, mounted on solid gold and engraved with the Canadian Coat of Arms. The 68,000 names will be inscribed by hand on the parchment work of several men, but 15 pages will be fully illuminated by Mr. Purves.

He intends to tell pictorially, year by year, the story of the war; for instance, the theme for 1914 will be the carrying of troops by the navy, for 1915, the pouring in of men from every province to aid their country, and so on. Mr. Purves also plans to work into his illuminated pages many realistic scenes showing the pleasures and pastimes of the men overseas.—Montreal Correspondent Canadian Press.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

Unemployment Measures

Relief Figures For Five Cities Tabled In House

A total of \$2,996,140 was disbursed to the cities of Vancouver, Calgary, Regina, Toronto and Quebec from last March to date under the government's unemployment and farm relief plan, according to a return tabled in the House of Commons. This sum was distributed in part in direct relief and in public works.

The totals for the various cities follow:

Vancouver	772,484.13
Calgary	630,600.84
Regina	354,044.76
Toronto	3,067,134.44
Quebec	252,297.35

Must Study Japanese

The study of the Japanese language is made compulsory under new regulations announced for all primary schools in Fengtien province, of which Mukden is the capital. Similar regulations are being enforced throughout Manchukuo.

Cambridge, England, is to have a new \$2,500,000 library building.

Formula For Treatment Of Ore Developed At Ottawa

It is anticipated that as a result of the development of a formula for the treatment of Canadian pitchblende ores, production of radium in its commercial forms can be carried out on a larger scale in Canada, with simpler processes and lower costs than anywhere else in the world.

Referring to the possibilities of the formula which was developed in the mines branch, Hon. W. A. Gordon, Minister of Mines, said:

"Fortunately for the new field, and fortunately for humanity, the Canadian process will permit as great, if not greater, percentage of recovery, involving a shorter time and less complicated operations than any of the known methods. I have every confidence that Canada not only will be able to supply our own needs for therapeutic, scientific and commercial purposes, but we will be able to enter the world markets in competition with any existing monopoly."

Valveless Motor Drive For Boats

Vast Alterations In Engine Production Seen By Inventor

Invention of a valveless four-cylinder motor for boats is claimed at Indianapolis, by John Irvine, who says he worked eighteen years on the project. Irvine believes the invention may result in vast alterations in engine production.

Valveless motors of two cylinders are in use, according to Irvine, but four-cylinder engines failed because of sticking of cylinders. Irvine said he had overcome this difficulty and found his invention to be a success in several tests.

The motor is water-cooled and is capable of driving a small craft 40 miles an hour, according to its inventor.

Irvine said he believed that with a few additional improvements his motor could be adapted to aeroplanes and automobiles.

British Museum Has Most Amazing Collection Of Old Newspapers Ever Assembled

Can you imagine coming downstairs one morning, getting your newspaper from the veranda, and over your grape fruit reading as current news that for the first time in history a locomotive had run on rails drawing 38 coaches at the staggering speed of 12 miles per hour?

The British Museum has just opened a new branch for the storing of its collection of newspapers, the most amazing collection in the world. In this new building is housed a copy of every newspaper—British, Dominion and foreign—published since the year 1800.

The enormous output of literature of every kind has made this new building a necessity. The British Museum endeavours to obtain a copy of every book printed, from multiplication tables and bedtime stories to the he-man Epic of Ethel M. Dell and the novels of Elinor Glyn. There was no room for both books and newspapers so the latter have been given a new home.

The new building is located at Colindale, near Hendon, some 10 or 12 miles from the Museum itself. It is of concrete and steel with brick veneer and cost over £300,000. It already contains 275,000 bound volumes of newspapers weighing 50,000 tons. They occupy 14 miles of shelves. There is still room to absorb the world's output of newspapers for the next 50 years.

The reading room is 87 by 30 feet with sitting room and ample desk accommodation for 26 readers. The work of binding is done on the premises by the museum staff.

The building is open to the public. Application has first to be made and a ticket of admission obtained. Armed with this, anyone can walk in, fill up a form and in a remarkably short space of time any newspaper required is laid before him.

It is an indescribable experience to read as red-hot news what we all once had to learn laboriously as history. These papers go back to the Battle of Trafalgar and beyond; the escape of Napoleon from Elba, his defeat at Waterloo, the abolition of slavery throughout British and, later, American possessions; the deaths of George the Fourth, William of the same regal number, Victoria the Good and Edward VII.; the crossing of the Atlantic by the first steamer, the inventions of a thousand and one miraculous things which are commonplace today; the last voyage of the great ship, Franklin's ill-starred expedition to the Arctic, the proclamation of a republic in France, wars by the score.

From a historical viewpoint probably these newspapers have little value, history being a matter of perspective, but at least they do portray current thought at the time events which have since become history were actually taking place. What a tragedy they do not go back further still. Think of the thrill of reading, today, the news of the death of Cleopatra—Queen of Egypt suicides. Famous beauty succumbs to asp bite—would make telling headlines.

Then the lead. Inconceivable in her grief at the death of Anthony, Cleopatra decided to end her life. Dismissing her servants and accompanied only by her favorite asp she retired to her couch. She was found later by a servant who gave the alarm. The court physician diagnosed the case of death as snake-bite.

The paper's medical correspondent would then describe for the benefit of the uninformed, the precise effect of a bite in the bosom. Alas there is no such newspaper in existence.

But the collection of newspapers which is gathered here must cause politicians a lot of uneasiness. They can always be confronted with what they said in a moment of exasperation or in the days before they turned their political coats inside-out.

There is no point in the question as to what Gladstone said in '84. The answer is on file. Gladstone, being dead, can never claim to have been mis-reported.

Record Sugar Beet Crop

The largest crop on record, the yield of sugar beets grown this year in the province of Alberta, Canada, is estimated at nearly 130,000 tons from which about 36,000,000 pounds of sugar will be produced with several hundred tons of molasses.

Mountain goats are classed as the rarest and wildest of Rocky Mountain game.

W. N. O. 1966

The Canning Season

Thrifty Housewife Will Store Away Fruits and Vegetables For Winter Use

A timely suggestion comes from the Dominion Fruit Branch at Ottawa in the form of a message which has a real appeal to housewives all over Canada, whether in the farm home or in the city. We all know the difficult straits in which many of our fellow citizens find themselves as a result of conditions entirely beyond their control. With a wealth of fruits and vegetables available at lower prices than for many years, and with other necessary things such as sugar and containers so cheaply available, there should be no need to elaborate about a ready response to the appeal "Just can a little more, if you can, when you can."

Mystery Chest Opened

Left By Bishop Has Mocked Inquisitive For 23 Years

The "mystery chest" left by the famous "heretical" Bishop Coleenso with instructions that it should not be inspected until the last member of his family has died, has at last been opened.

For 23 years the chest stood in St. Mary's church at Marlborough, Natal, S.A., mocking the inquisitive. Government and church officials crowded around when it was opened. Only an ant's nest and a piece of red cloth were found inside.

PRIEST RUNS A TOTE CLUB

A tote club organized by a Roman Catholic priest, Father Carless, of St. Ann's Church, in the heart of London's dockland, has a membership of 1,500, including 200 women. Father Carless considers betting a legitimate pastime, and as nearly all the members back horses and dogs, he wishes them to get as fair a chance as possible. The profits will be used to pay for the club first and later to improve their social life. Father Carless is shown at the Tote window paying out.

Prairie Wheat Crop

Bank of Montreal Report Places Yield At 415,000,000 Bushels. Taken as a whole, the principal field crops of Canada have seldom attained such total volume as during the present season or been of a higher quality. Yields were generally satisfactory in each of the provinces, despite sectional reverses due to weather conditions or other causes. A preliminary estimate of the Dominion Bureau of Statistics placed the total yield of wheat in the prairie provinces at 446,000,000 bushels but from latest reports a total of around 415,000,000 bushels is now anticipated. Even so, the yield is well in excess of the ten-year average and the largest crop since 1923.

Last year's prairie crop was approximately 300,000,000 bushels. The wheat marketed to date has graded exceptionally high and tests indicate that the high protein content will be maintained. The western oat crop is estimated at 274,000,000 bushels against 183,700,000 bushels last year and the barley crop at 70,000,000 bushels as compared with 50,000,000 bushels.

Severe Test For Firemen

Milan Brigade Called Out To Stop Flood Of Molten Glass. The ingenuity of the Milan Fire Brigade was put to a severe test when firemen were called out to stop a flood of molten glass.

One of the sides of a huge furnace tank in a glass factory suddenly gave way and immediately the whole floor of the factory became flooded with liquid glass.

The workmen all managed to escape, but could not stop the flow from the tank, and the transparent lava spread to the doorway, into the street, and down stairs to the cellars of the factory.

The Fire Brigade sent for large supplies of ice, with which the firemen solidified the creeping margin of the glass. They then turned to the seething bulk itself, hosed it with ice water, and gradually made it all solid.

Next day, with the factory very much under glass, the second phase of the work was begun—the liberation with pick and hammer of the densely encased premises.

Workmen's jackets and other personal belongings were visible in the glass as if preserved in ice.

LITTLE JONES (to hobo): "You run a great risk, my man, soliciting alms. How do you know you are not addressing the Chief Constable of the city?"—London Opinion.

Eight Points The Careful Driver Will Observe In Order To Decrease Motor Accidents

Fur Auction

Collection Of Arctic Timber-Wolf Skins Sold In Winnipeg

A collection of 282 arctic timber-wolf skins was sold by auction in Winnipeg recently, the outstanding feature of the Dominion Fur Auction Company's October sale of raw furs. The skins were the property of the Dominion Government and on each one of them a Bounty of \$20 had been paid to the trapper regardless of its size or quality. A substantial portion of the pelts had been taken from small pups and the average price realized was consequently lowered considerably.

Prices ranged all the way from 25 cents for small damaged skins up to \$20.50 for large sizes of good quality. The collection averaged \$11.

A collection of late-caught beaver ranged between \$11 and \$17.50 and averaged \$9.50 unchanged to five per cent, higher than the prices realized in August. Cross fox sold unchanged to five per cent, higher, realizing from \$1.50 for badly rubbed skins up to forty dollars for good specimens.

The mink collection was very spry and prices realized were not representative. The range was 25 cents up to \$5.00. Red foxes were in poor demand and mostly bought back. Muskrats were all bought back.

White foxes brought around \$18 for one and two with average Mackenzie River and Chatterfield Inlet lots bringing from \$16 to \$16.75, unchanged from the August level.

Marten advanced 10 per cent, ranging up to \$21.50 and averaging \$10.50. Otter was in poor demand and sold unchanged, the range being from \$2 to \$10.

A collection of 2,500 weasel attracted fair demand, advancing about five per cent. Prices ranged from 25 cents up to \$2.75 and averaged 30 cents for the skins sold.

Ordinary weasels declined about 10 per cent, ranging from \$8.25 down to \$2.75 and averaging \$5.00.—Manitoba Free Press.

Making Air Travel Popular

Sweden's Aerotransport Company Find Ways To Stimulate Business

In spite of the depression there was an increase of about 50 per cent. in the number of passengers on Sweden's continental air lines during the first six months of this year according to a statement by Captain Hornsten, the head of the Swedish Aerotransport Company. About 75 per cent. of the passengers are business men who are attracted by the saving of time in transit and by the safety and regularity of the aerial traffic.

The former time of transit between Malmo and Paris, eleven hours, was this year brought down to seven hours, and will next year be further reduced to about five hours, thanks to the fact that luncheon will be served in the planes to eliminate the previous luncheon interval at Amsterdam. Other novel features are the facility for the passengers to send private radio messages while in the air and the introduction next year of special night planes with sleeping accommodation for the passengers.

As a further stimulant to the interest in using the air lines the Aero-transport Company has now reduced the fares of the Baltic Air Express by 25 per cent. on the Malmo-Paris stretch, so that the cost approximately corresponds to the second class railway fare.

Trade With France

Negotiations for a new trade treaty between Canada and France are expected to open shortly. Hon. C. H. Cahan, secretary of state in the Dominion Government, returns from Geneva soon, where he was Canada's delegate to the League, and it is anticipated preliminary conversations will begin then. French authorities are understood to be favorable.

Germany Buys Our Eels

The largest market for Canadian eels, states a report of the Department of Trade and Commerce, is in Germany where considerable quantities are shipped annually. A cargo of 50,000 pounds of eels, the second largest shipment this season, has started the trade for the present season.

The smallest fog particles have been measured at the Massachusetts Institute of Technology. It was found that 25,000 of them could be placed on the head of a pin.

Motor vehicle officials in Massachusetts are convinced that there are eight big points of difference between drivers who do not have accidents and those whose records are beset with mishaps.

They believe if all drivers could be made to realize that these eight accident factors are the primary ones, and that if they both knew what they were and how to avoid them, the traffic safety situation would be benefited enormously.

That is why they devote two months every year at the height of the travel season to the especially strict enforcement of these eight "thou shalt nots" with the idea of educating drivers as to their importance. The campaign is more, then, than a sporadic period of rigorous enforcement.

It might be interesting for the average motorist to sit down with a pencil before reading the list of mishap factors and see how many of the might he can name and in what order he places them. They have not been selected by chance but on the basis of a thorough study of traffic mishaps over a long period of years. The list follows:

Driving too fast for conditions.

Passing another vehicle going in the same direction when the view ahead is obstructed.

Failure to keep to the right of the road.

Failure to slow down for intersections.

Failure to slow down when approaching pedestrians.

Failure to observe the law regarding stopping for street cars taking on or discharging passengers.

Disregard of traffic control devices, signs, signals and stop lights.

Dangerous and improper parking, as on curves and corners.

The eight points might well be taken on by any motorist anywhere as his guide to an accidentless driving experience. If he were to undertake the task of self-education, it is doubtful that he could find a better point of beginning than that of learning just what careless, heedless, or reckless manifestation in traffic is likely to get him into trouble.

He could make enormous headway in improving his safety were he to realize the full meaning of only the first factor; that of driving too fast for conditions. There never has been an accident tabulation or analysis which did not rank this as the most serious breach against the canons of safe operation. Even the most liberal-minded motor vehicle officials, those who have stood for the elimination of all maximum speed limit laws, enter no demurrer to this indictment of speed.

Therefore, if the car operator wants to be safe as far as the Massachusetts eight points are concerned, his procedure is to decide to use his intelligence at all times in selecting his speed and to obey the law with respect to the other seven qualifications of a careful operator.

May Investigate Coal Prices

Canadian Fuel Board Has Been Requested To Act

The Canadian fuel board has been requested by Hon. W. A. Gordon, Minister of Mines, to enquire into and prepare a memorandum of the facts on coal prices in Canada. Official announcement to this effect was made by the minister.

Action is being taken on recent suggestions that coal prices were somewhat high. The question engaged the attention of the senate recently when Rt. Hon. Arthur Meighen suggested the senate might undertake an inquiry into this matter.

In the senate, the question of coal prices arose when Hon. Cairine Wilson called attention to an article in a Toronto newspaper which had alleged the existence of a coal combine in British anthracite.

"I believe in love at first sight—I have experienced it myself ten times lately."—Lualaba Kiute, Leipzig.

WORLD HAPPENINGS BRIEFLY TOLD

Actual operations on the establishment of the trans-Canada canal of airfields began on November 1.

Over 50 French language weeklies in the province of Quebec have joined in formation of the "French Weekly Newspaper Association of Canada."

Over sixty per cent. of the creamery butter produced in Canada comes from two provinces, Ontario and Quebec.

Premier Benito Mussolini appealed to the United States to cancel or reduce the European war debts in an open air address at Turin, Italy.

Practicing barrister and resident of Winnipeg, Man., for half a century, Henry Nason, 76, is dead. Born in Weston, Ont., he came to Winnipeg in 1882.

Fourteen persons were killed when a floor collapsed in a house near Giza in upper Egypt while a wedding ceremony was in progress. The bride was one of the victims.

The Alberta Government and the Dominion Administration will be asked to render assistance in a scheme to provide flood control on the Bow River at Calgary.

A plaque bearing the names of 133 French soldiers who lost their lives during the siege of Yorktown 151 years ago, has been unveiled in Paris, France.

The Dowager Marchioness of Lansdown, widow of the fifth Marquis of Lansdown who was Governor-General of Canada from 1883 to 1888, died recently in London, England.

Judge Holman Gregory was appointed common sergeant of the City of London in succession to Sir Henry Fielding Dickens, sixth son of Charles Dickens.

The decision whether all Canadian wheat shipped to United Kingdom ports shall enjoy the six-cents-a-bushel preference or only that going direct from Canadian ports is a matter for the British Government, Hon. H. H. Stevens, Minister of Trade and Commerce, said.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile
No Calomel needed
When you feel blue, depressed, out of sorts, that's your liver which isn't pouring its daily two pounds of liquid bile into the digestive and elimination are being slowed up, food is accumulating and disease finds you and making you feel wretched.
More brownness in the face, bitter water, inactive count or chewing gum, or haggard, don't go far enough.
You need a liver stimulant. Carter's Little Liver Pills is the best one. Safe, pure, vegetable. Bore. Ask for them by name. Refuse substitutes. See at all druggists.

Canada's Bicycle Output
There were 18,429 bicycles manufactured in Canada in 1931. These were valued at the factories at \$485,636. Men's bicycles numbered 17,319 valued at \$458,631 and women's and children's totalled 1,110 valued at \$27,005. Bicycles manufactured in 1930 totalled 26,828 and had a value of \$706,386.

Customer—You said the tortoise I bought from you would live 300 years and it died the day after I bought it. Dealer—Now, isn't that too bad. The 300 years must have been up—

Sounds Like Magic

Press Button In High-Speed Restaurant and Food Appears

"No waiting" is the slogan of a restaurant just opened in Prague. Diners don't wait for the waiters, for there aren't any waiters to keep them waiting. As he walks through the hall of the restaurant the customer chooses his meal from gigantic menu boards hanging on the walls. Arrived at the office, he gives his order and receives a ticket with a number upon it. He then goes to the seat bearing that number.

Down the middle of the table runs a broad travelling band, and barely has he taken his place when his first dish comes bobbing along. He removes it from the band, disposes of it, and then places the empty plates and dishes upon another band beneath the table, which moves in the opposite direction. Meantime he presses a button and in a matter of seconds the next course appears. The dirty plates and dishes are carried by their band to the washing-up department, whence yet another band takes them back to the kitchen. The price of a three-course meal is about twenty-five cents, and so well is the restaurant paying that its owner is talking of supplying another course for the same money.

Deserves The Honor

Earl Byng Earned Award Of Field Marshal's Baton

General Byng had a remarkably good record as a commander in the great war and richly deserves the field marshal's baton that has been awarded to him. The Canadian expeditionary force served under General Byng, who, after the war, became governor-general of this Dominion.

When a British soldier is given "the baton," he reaches the highest rank in the army, that of field marshal. The baton is a short staff presented by the King as a symbol of office. No one is made a field marshal unless he is of royal blood and has rendered distinguished service.

The Loneliest Island

Conrad Liner "Carinthia" To Visit Tristan De Cunha Next Year

Weather permitting, Tristan De Cunha, loneliest island in the inhabited world, will be visited by the Conrad World Cruise Liner "Carinthia" while on her journey around the world, via the southern hemisphere, early next year.

A large quantity of food supplies will be sent ashore for the lonely island, and the captain of the "Carinthia" will offer a banquet to the islanders in the dining saloon of the ship.

It will be imagined with what pleasure, the hundred and sixty inhabitants will look forward to seeing the "Carinthia," when it is realized that more than a year sometimes elapses without a ship calling here. When a ship called two years ago at the island, the natives said they still had plenty of canned sardines, epon salts, and Bibles. They requested poison for rats, their one mongoose being unable to make serious inroads on the hide-outs of the rodents.

Although the inhabitants frequently become depressed over the scarcity of food and long absence of ships, they always refuse to leave the island when offered land elsewhere. They are often without mail and newspapers for a long time and their food supplies are often insufficient because the soil and the sea give them poor support.

The island is the largest and the only inhabited one of a group of three, situated in the middle of the south Atlantic, and was named after a Portuguese admiral who discovered them in 1506. The main island, Tristan, is an extinct volcano, and rises 7,640 feet above the level of the sea. The crater summit is filled with fresh water. St. Helena, 1,320 miles north, is the nearest inhabited land, while Cape Town is 1,400 miles east, Buenos Aires 2,500 miles west, and the South Pole, 3,200 miles south. Until the middle of the last century the neighboring waters were visited by American whalers, but with the decline of the whaling industry these visits ceased. The whalers have been sadly missed by the Tristanians.

Five nationalities live on the island today—English, Scotch, Irish, American and Italian. There are intermarried, and of course, there are few family names, there being four families named Glass, eight named Green, four named Rogers, two named Swain and five named Lavello.

The only lights on the island come from lamps filled with oil made from the blubber of sea elephants. Strange to relate, the people like poetry.

The temperature ranges from 70 degrees down to 40 degrees. Edinburgh, the only settlement on the island, named for the Duke of Edinburgh, who visited the island in 1867, is on a plateau nine miles long and one and one-half miles wide. The settlement is 115 years old. A system of barter prevails, but there is no money.

Foreman (on excavating job): "Do you think you are fit for really hard labor?"

Applicant: "Well, some of the best judges in the country have thought so."

* Do You Know? *

Photograph, Canadian National Railway
Although practically everyone who has been in the Canadian northland has heard and seen a Lion, few have ever discovered their nesting place or seen their eggs. The photograph shows a Lion's nest with two eggs in it.

FAT MAN LOSES 63 lbs.

Kruschen and Walking

Overweight men who want to lose a few pounds can have the benefit of this man's experiences. He gives them to us for publication.
"In a little over twelve months I have reduced my weight from 237 lbs. to 184 lbs., by taking a dose of Kruschen Salts every morning for six months, and taking walking exercise every day. This remarkable achievement all the more interesting when one considers that I did not resort to any form of dieting."—G. L. B.

You can take off fat with Kruschen Salts if you will take every morning before breakfast, modify your diet, and exercise regularly.

While you are losing fat you will be gaining in energy—in endurance—in ambition. The old arm chair won't hold you any more—you'll want to be up and doing—you'll enjoy work and the recreation you'll sleep like a top. You'll lose fat, and probably live years longer.

Canadian Wheat Exports

Volume Is Much Greater This Year Than Previous Season

For the first 11 weeks of the current crop year, exports of Canadian wheat totalled 53,600,000 bushels compared with 29,453,200 bushels for the same period of last year, according to a report issued by the Dominion bureau of statistics. For the week ended October 14, the total was 6,946,766. This was a decline from the previous week of nearly 1,000,000 bushels.

The following table shows the quantities exported and their channels of exportation in the first 11 weeks:

	1932	1931
Montreal	24,931,813	11,774,077
Vancouver	13,198,374	8,012,760
Quebec	2,736,029	Nil
Sour	8,623,852	1,785,791
Cherbourg	431,371	89,326
Victoria	314,627	544,769
Trieste	1,000,000	Nil
U.S. Ports	5,746,000	7,248,000

An Optical Illusion

Experience Most Drivers Have When Approaching Intersection

A car coming from the right at a street intersection will always seem to be going faster than it actually is. This is an optical illusion produced by the action of yours and the other fellow's car arriving at the point of a "traffic wedge" at the same time. As the cars bear the point of this wedge seems to increase in speed when as a matter of fact they may be slowing down.

When meeting a car under such circumstances it is best to be guided by the illusion and slow down accordingly, but caught in a situation where you are too late to avoid a collision by stopping it is well to know that the other car is not travelling as fast as it seems and that you can reach the crossing safely by speeding up a little.

Paul Whiteman defines a diplomat as a man who can give his wife a \$60 washing machine and make her forget it was a \$600 fur coat she wanted.

Established just a century ago, with a strength of 100, the city of London police force now numbers 1,200, and has its own wireless receiving station and "flying squad."

SUNDAY SCHOOL LESSON

NOVEMBER 6.

THE CHRISTIAN AND WORLD PEACE

Golden Text: "Blessed are the peacemakers for they shall be called sons of God."—Matthew 5:9.

Lesson: Psalms 22:27, 28; 67:1-7; 72:1-19; Isaiah 2:1-4; Matthew 28:16-20; Ephesians 2:14-18.

Devotional Reading: Psalm 46:1-11.

Explanations and Comments

A Vision Of the Righteous King, Psalm 72:1-7. The Psalmist prays that the king may be so just and right that his subjects will be guaranteed justice and peace. "Some actual ruler—Solomon, Hezekiah, or another—is no doubt in view, but as in Psalm 45, the royal figure is so idealized that the Psalm becomes truly Messianic, and applicable only to the perfect Divine King."—Dummelow.

A Vision Of the Righteous King, Psalm 72:1-7. The kingdom over which the righteous king will rule will expand until its frontiers reach the confines of the sea. Desert tribes will bow before Him, and His enemies will fall in humble obedience into the dust at His feet. Tribute will be brought from Cush—beyond the western sea—and from the nearer lands; gifts will be brought to Him from the kings of Sheba (southern Arabia), and Seba (west of the Red Sea). He will pity the needy and the poor, and no drop of their blood will be allowed to be shed unjustly. Prayers will continually be offered for him and blessings showered upon him.

"The sense of God was prevalent with the Hebrews in the days when these Psalms were written. They lived in the consciousness that the God of their fathers tabernacled amongst them. The same consciousness was characteristic of the great past, before materialism and wealth had eaten into the life of the nations. The stages of modern civilization would hardly be too much to give, if it were possible, to get men to pray continually and to bless God all the day long."—F. B. Meyer.

Christ Is Our Peace, Ephesians 2:13-19.—Gentiles and Jews are now one in Christ, Paul proclaims. "Paul is thinking of the fact that the relation between Jew and Gentile, and between both Jew and Gentile and God, have been put upon a new basis by the coming of Christ. A new covenant has been made, and one of its terms is that the Gentile is to be admitted to the fellowship of the church on the same terms as the Jew. The death of the Messiah who effected this change was necessary to play a real part in the change. It 'sealed' the covenant."—G. A. Johnston Ross.

Pie Crust Easily Made

No Skill Required For Success With New Method

The making of a good pie crust used to be one of the criteria by which a housewife's skill was judged. Most experienced cooks will remember the anxiety with which they learned to blend and shortening, and their difficulty in adding just the right amount of ice water. Since different flour contains varying capacities for absorbing moisture it took experience to know by the "feel" of the pie dough when it was ready for rolling.

The hard to make, from a technical point of view, but it took time and there were plenty of utensils to wash afterwards. Now there is a new method of making pie with crumb crusts and uncooked fillings which is being hailed with delight.
Sweetened Condensed Milk is the "magic" ingredient which makes these new pies possible. These easy combinations of pie crusts and fillings are divided into three groups: meringue pie, and cream pie. The fillings in each case are made by blending sweetened condensed milk and lemon juice. This makes a thick, rich base to which various kinds of fresh fruits may be added.
In making the crust for meringue pie blend one cup crumbs (graham cracker, toasted graham bread, chocolate wafers or lemon snaps) with 1/2 cup sweetened condensed milk and a few grains of salt. Line a well-buttered pie tin with this crumbly mixture and pat into shape. Pie made with this crust should be spread with meringue and require only as much time in the oven as is needed to brown the fluffy topping.

If whipped cream is to be used in place of meringue roll 1/2 cup of crumbs and cover bottom of buttered pie plate. Cut half of wafers or crackers and set them around the edge of the pie plate. This type of crust needs no baking at all.

Both types of pie require thorough chilling for several hours. Raspberries, blueberries or strawberries may be used in place of blackberries in the Blackberry Meringue Pie which is given below.

BLACKBERRY MERINGUE PIE
1 1/2 cups 11 can Eagle Brand Sweetened Condensed Milk.
2 eggs.
2 cups blackberries.
2 tablespoons granulated sugar.
Toasted Graham Bread Pie Crust.

Blend together Eagle Brand Sweetened Condensed Milk, lemon juice and egg yolks. Fold in blackberries which have been slightly crushed. Pour into nine-inch pie plate lined with Toasted Graham Cracker Pie Crust. Cover with meringue made by beating egg whites until stiff and adding sugar. Bake in a moderate oven (350 degrees Fahrenheit) until brown. Chill before serving.

Switzerland has a lower-cent drive.

Try Lydia E. Pinkham's Vegetable Compound

She's Up in the Air Again

Those she loves... are first to suffer when monthly pain shatters her peace. Lydia E. Pinkham's Vegetable Compound would ease that awful agony.

Mixed Marriages Not Favored By Italians

And Nearly All Weddings Are In Place Of Worship
A curious "stay home" custom still prevails among Italians with regard to marriage. There are hardly any mixed marriages. Of those who found spouses last year, 98.93 per cent. of the Catholic men married Catholic wives. Of the very small fraction who went further afield married women of other Christian cults, and the other married wives of the Jewish faith.

Of the women, rather fewer Catholics married Protestants or Jews and only a dozen espoused men who registered as "without any religion." On the other hand 28.52 per cent. of the Jewish men married and 27.52 per cent. of the Jewish brides chose either Catholics or Protestants.

Although a purely civil marriage is now legal, about 96.88 per cent. were married in a place of public worship.

An Important Business

The making of lauts, trees, and shoe findings in Canada has grown into quite an important business. The factory value of the output in 1931 was \$1,190,403. The business also turns out some interesting sleds, not included in the above. These are alley bowls, ten pins, duck pins, golf club heads, tongue depressors, wooden canyons and sticks, etc. The factory value of these last year was \$21,160. There are seven factories in Quebec, two in Nova Scotia and two in Ontario.

The states of Texas is as large as 212 Rhode Islands.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework, it is only natural that a worthwhile substitute for the dusty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper actually does it—so it cleans—as it polishes in receiving a heavy welcome from Canadian women who detest dust cloths and all they stand for. Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade fragrance, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a dust cloth. You merely crumple a sheet into a soft wad, and go over the surfaces requiring attention. You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you're through—throw it away. No dust to shake out or wash. No bother at all. The most obstinate part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous PARA-SANI heavy waxed paper in the Green Box. Most grocery, hardware, drug and department stores sell Appleford Wonder Paper. If yours doesn't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Leftovers."

MAKE CHANGES IN OPERATION OF RAILWAYS

Ottawa, Ont.—The "Canadian National Canadian Pacific Act of 1923," containing legislation designed to bring about far-reaching changes in the operation and conduct of the Dominion's transportation system, was introduced in the senate recently by Rt. Hon. Arthur Meighen, government leader.

Following the recommendations contained in the report of the royal commission on railways and transportation, of which Mr. Justice Lyman P. Duff, of the Supreme Court of Canada, was chairman, the act is divided into three parts.

Part one deals with reorganization of the Canadian National system. It provides for replacement of the board of directors by three trustees, one of which, the chairman, will devote his full time to the work, and whose tenure of office will be seven years. The salaries are not fixed in the act.

The trustees will have full power to control the Canadian National without consultation with the shareholders or with the government, and will appoint managing officers, including a president, who will be responsible only to the trustees.

Part two deals with co-operation between the Canadian National and Canadian Pacific and orders that the two systems take whatever steps desirable to eliminate, consistently with the proper handling of traffic, unnecessary, wasteful or uneconomical services, and to make joint use of facilities wherever advisable. No authority for any amalgamation of companies is given.

Part three sets up a tribunal to deal with the disagreements between the two systems. This body will be composed of the chief commissioner of the board of railway commissioners for Canada, who will be presiding officer, and one representative each from the Canadian National and Canadian Pacific.

In disputes of major importance either company may ask the president of the Exchequer Court of Canada to appoint two additional members to the tribunal. In the event of any conflict between an order of the board of railway commissioners and the tribunal, the order or decision of the tribunal shall prevail. Appeal from its judgment will be to the Supreme Court of Canada.

Earl of Bessborough Celebrates Birthday

Canada's Governor-General Passes Fifty-Second Milestone

Ottawa, Ont.—Born on October 27, 1880, the Earl of Bessborough, Governor-General of Canada, has celebrated his 52nd birthday. Birthday felicitations were extended to his excellency from all parts of the Dominion, and from many distant lands in which he is widely known.

The Earl of Bessborough is the ninth holder of a title which dates back almost 200 years to 1739, when the first Earl of Bessborough was created. He succeeded to the title on the death of his father in 1920.

Montreal Bandits Make Haul

Montreal, Que.—A swiftly executed hold-up secured for three unmasked men the sum of \$12,000 in cash, and bonds valued at \$1,500, when they swooped down on a branch of La Banque Canadienne Nationale, on Cherrier Street, locked the manager and five employees in the vault, scooped up the money and escaped.

Says Capitalist System Fails

Toronto, Ont.—The capitalist system has failed and changes must be made to meet conditions, but the changes must be made in an orderly fashion, without violence or haste. This is the conclusion of Sir Norman Angell, M.P., famous student of international politics and former journalist.

No Offer Made

Ottawa, Ont.—The area known as "Garibaldi Park," in British Columbia, has not been offered to the Canadian Government on any terms, the House of Commons was advised in reply to a question asked by A. E. Munn, (Cons., Vancouver North). The question was answered by Sir George Perley, Minister without portfolio.

Air services between Haiti and Kingston, Jamaica, have just been inaugurated.

W. N. U. 1906

Canada Assured Of Large Lumber Market

But Full Advantage Cannot Be Taken For Some Time

Ottawa, Ont.—Assured of a large potential market for lumber in the United Kingdom under the new trade treaty with that country, Canada will not be able to take full advantage of it for from three to five years. This statement was given the House of Commons by one of the leading operators of northern Ontario and the chairman of the committee which represented the Canadian lumber industry at the imperial economic conference, George B. Nicholson (Cons., Algoma East).

It was one of two conflicting views on the effect of the treaty on the lumber industry given the House in the course of the debate on ratification of the treaty.

A. W. (Ind., Comox-Alberta), said the lumber preference would be of no value to Canada because Scandinavian countries, operating on depreciated currencies, could still undersell Canada.

Mr. Nicholson said the potential market for Canadian lumber obtained would amount to more than 1,000,000 board feet. The British market at the moment, was saturated with lumber from Russia and central Europe and Canadian lumber had not sufficient stock on hand to satisfy the British market.

Oil Company Withdraws

Montreal Firm Decides To Drop Russian Barter Scheme

Montreal, Que.—One party to the three-cornered aluminum products deal has decided to withdraw from the transaction. Joseph Elie, a director of LaSalle Petroleum Refinery Company, has announced his company will not accept further shipments of oil.

"There seems to have been some dissatisfaction about the whole deal," Elie said. He did not, he said, wish to be "bothered" with any more of the business.

Ottawa, Ont.—Complaints in connection with the quality of the Soviet oil imported recently into Canada are being investigated, the Prime Minister told Hon. Ian MacKenzie (Lib., Vancouver Centre), in the House of Commons.

Lose Trade Advantage

Irish Free State Will Not Receive Benefit Of Preference After

November 15
London, England.—The Irish Free State will lose the advantage of imperial tariff preferences in the United Kingdom on November 15, J. H. Thomas, Dominion Secretary, told the House of Commons.

On that date, he explained, preferences granted goods from the Dominion under last year's tariff act will expire, and as the Free State failed to conclude any trade agreement with the United Kingdom at the Ottawa economic conference its exports to Great Britain will be accorded tariff treatment similar to that affecting goods from foreign countries.

Indian Terrorists

Disease-Infected Needles Said To Be Used On European Girls

London, England.—The Exchange Telegraph Agency's Calcutta correspondent reported that political terrorists in India are using disease-infected needles in attacking European and Anglo-Indian office girls en route between their offices and homes.

Thirteen cases of such attacks already have been reported, the correspondent said.

To Discuss Tariffs

Ottawa, Ont.—Liberal members and senators met in caucus to set up committees to study individual tariff schedules affected by the Canada-United Kingdom Trade Treaty. The tariff schedules will be reviewed individually by the House of Commons after the treaty as a whole has been ratified.

Thought It Was a Gas Station

Galt, Ont.—A joke is a joke, but when motorists said injury—that's different. William Mulhall, Detroit, for instance, sped through the village of Barr at 62 miles per hour. When he appeared in court, he declared he thought the village was a gas station. He was fined \$5 and costs.

Depression Hits Shippers

London, England.—The annual report of Lloyd's register on shipping revealed that the economic depression has laid off 15,000,000 tons or the equivalent of 30 per cent. of the world's total shipping.

Russian Plan Is Ahead Of Last Year

But Increase Planned For 1932 Not Half Reached

Moscow, Russia.—With the end of the first five-year plan only a little more than two months off, official figures published showed that Russia's industry as a whole accomplished less than half the increase planned for 1932, but still is running considerably ahead of last year.

The country's entire industrial production for the first eight months of this year, including heavy and light industries, timber and food industries, reached a combined average of 14.9 per cent. above the same period of 1931, as compared with a scheduled increase of 36 per cent. for the whole year of 1932.

Preparatory Conference

Conference To Negotiate Russo-Japanese Treaty Is Called

Tokio, Japan.—A preparatory conference to negotiate a non-aggression treaty between the Soviet Russian and Japanese Governments will be held here, the News Service Nippon Denpo said.

Count Yamauchi, Japanese foreign minister, conferred with Premier Makoto Saito and Sadao Araki, war minister, regarding the treaty. After hearing Ambassador Koki Hirota's report on the Russian attitude, Yuchi ordered his office to start preparations for the treaty.

WORK TO BE PROVIDED FOR THE UNEMPLOYED

Ottawa, Ont.—Public undertakings such as sewers and waterworks, to an amount running between \$11,000,000 and \$12,000,000 will be completed in various municipalities throughout Canada up to the end of December, as a measure of unemployment relief.

Road construction will be carried out in Nova Scotia, Ontario, Manitoba and Alberta. Relief camps will be operated in the prairie provinces. Additional families will be placed on farms in eight of the nine provinces.

In the west the plan of boarding men on farms, with the farmer receiving \$5 per month and the boarder a similar sum, of which the Dominion Government will pay 50 per cent. will be continued. Work will be undertaken in the national parks and by the department of national defence in the establishing of emergency landing fields.

The amount of money granted by order-in-council to the Minister of the Interior for the work which is to be carried out this winter in the national parks of Canada is \$200,000, according to the terms of the order-in-council tabled in the House of Commons. The money takes care of homeless single men.

"I am confident no one in this country need worry about being provided with food, clothing and shelter this winter," Hon. W. A. Gordon, Minister of Labor, informed Hon. Ian MacKenzie (Lib., Vancouver Centre), in the House of Commons.

BRITISH JOBLESS CONVERGE ON LONDON

It is understood from the British Home Office that communistic organizations are responsible for the attempt of an army of unemployed men to disrupt the Parliamentary session which is at present in progress. Above is a good photo of the Mother Parliament, while inset is Premier MacDonald, who is endeavouring to overcome what might be a serious disturbance.

ARCHBISHOP WORRELL

In order that the work of the Anglican Church in the Prince Rupert Ecclesiastical Province may survive the calamity brought about by expropriation of funds by ex-Chancellor Macgregor, Archbishop Worrell, Primate of the Church, has initiated the opening of a fund to which the general body of bishops and clergy and members of the Missionary Society will be asked to contribute.

Noted Economist Resigns

Sir Walter Layton Leaves Committee Of World Conference

London, England.—Sir Walter Layton, noted economist, announced his resignation from the preparatory committee of the world economic conference because of a "serious difference of opinion" between himself and the British Government.

He said he had differed with Neville Chamberlain, Chancellor of the Exchequer, on "what further action is required in order to restore reasonable freedom to the movement of international trade."

Sir Walter does not think the government view that the desired result can be obtained through individual negotiations with foreign countries within limits set by the Ottawa agreements and subject to strict insistence on most favored nation rights will be successful.

Scottish Parliament

No Benefit To Be Gained By Asking For Home Rule

London, England.—Scottish Conservative members of the House of Commons decided not to support any move for home rule in the northern half of the United Kingdom.

At a meeting held under the chairmanship of Sir Robert Horne, a former Chancellor of the Exchequer, they reached the conclusion no benefit could be obtained by setting up a Scottish parliament.

Tea Consumption In Canada

Montreal, Que.—Canadians drink four pounds of tea per capita annually, two-fifths as much as Englishmen and half as much as Australians and New Zealanders and about five times as much as people in the United States, according to T. Reid, of the Ceylon Association, who is returning to England after making a survey of the Canadian market for tea.

Short Rail Haul

H.B. Route Offers Decided Advantage For Shipping Cattle To Britain

Saskatoon, Sask.—The short rail haul from the prairies to Churchill make the Hudson Bay route most advantageous for the shipping of cattle to the British market, was the opinion expressed by Professor A. M. Shaw, dean of agriculture, at the quarterly meeting of the Saskatchewan Board of Trade. "The navigation season opens too late to permit of large movement of grain fed cattle," he said, "but affords ready and profitable outlet for grass fed prairie beef."

Dean Shaw was of the opinion that cross-bred cattle, developed through experiments carried out by the University of Saskatchewan, made it possible for Canadian packers to compete with Argentina in the chilled meat market in Great Britain.

Federal Aid Requested

Regina. Thinks Government Should Share Expenses For Airport

Regina, Sask.—Dominion assistance in bearing part of the carrying charges on the Regina municipal airport will be sought by City Commissioner R. J. Westgate, who has gone east. Mr. Westgate will be absent from the city for about 10 days. During that time he will attend a meeting of the Anglican Church in Toronto and will visit Ottawa on civic business.

It has been the claim of the city that the airport was developed to its present state because of the air mail service. Since this service has been discontinued, the port is no longer revenue producing and the contention is that of the fixed charges the Dominion Government should assume part.

Provinces Will Be Aided

Federal Government Promises Help

Ottawa, Ont.—The government is not in a position to make any exact pronouncement or policy respecting unemployment relief, but if any responsible provincial government officials report their inability to care for the needy within their jurisdiction the government will take "adequate action," Hon. W. A. Gordon, Minister of Labor, told the House of Commons.

FAIRNESS TO ALL IN PENITENTIARY INVESTIGATION

Ottawa, Ont.—Local radicals planned a demonstration on parliament hill in connection with the visit of 15 relatives and friends of the Communists confined in Portsmouth penitentiary, according to notices posted here.

A sweeping investigation was under way at Portsmouth penitentiary with fairness being meted out to all, and so far there had been no development indicating the necessity of a public inquiry, Hon. Hugh Guthrie, Minister of Justice, said to 15 members of the Canadian Defence League who waited upon him. The party was refused admission.

"If a situation develops," the Minister told the delegation, "that calls for a general or open inquiry, I will be prepared to consider it. At the present time I see no reason for such an inquiry."

With a suggestion of Edward Smith, Toronto, that the riots at the institution "were strikes, the same as the strikes of any industrial workers," the Minister of Justice disagreed, holding them more in the light of revolts.

The eight incarcerated Toronto Communists were styled "political prisoners" by the delegation, who were entitled to special treatment. "We have no political prisoners in Canada," the Minister of Justice declared. "Anyone can hold any political ideas he may like so long as he stays within the law. We have no political prisoners."

No discrimination whatever would take place at the institution in regard to the eight Communists, Mr. Guthrie stated. "No favors or no discriminations will be shown to any prisoner during the inquiry."

"These statements are being taken down by a competent stenographer, and will be forwarded to me from day to day," the Minister declared. No copies had reached him yet. When conditions became normal, the Minister said he personally would see that the visits of relatives to the prisoners would be resumed.

MANY INJURED IN BOISTEROUS RIOTS IN LONDON

London, England.—Two thousand hunger marchers, converging on London from all parts of the island, reached their goal in Hyde Park, traditional home of free speech, and precipitated the most boisterous riot London has seen in years. A score were hurt, nine requiring hospital treatment.

Singing revolutionary songs, the jobless demonstrators swung through London traffic behind the banner of the Communist hammer and sickle. Up to the Marble Arch which leads into the park from Great Cumberland Place they marched through lanes of mounted police.

A squadron of police moved their horses to press back the crowd. Somebody threw a brick through a post office window. It was the signal for battle. Men and women in the mob screamed defiance at the police. The mounted men charged and the mob fell back, only to form again. Bricks and stones whizzed past the policemen's heads. Dozens of windows were broken. The rioters pulled branches from the trees in the park and tore up the park railings as weapons.

When the shouting and the tumult of the riot was at its height mobs formed inside the park and threatened the police from the rear. For a time it looked as though things might get out of hand. The police, however, had made elaborate preparations for just such an event and they were ready. But it took an hour to subdue the rioters.

At the beginning of the trouble the crowd inside the park, around 50,000, had been entirely peaceable. Two dozen or more soap boxes had been set up and from these the orators raved against the conditions of the jobless. Most of their condemnation was directed against the "means test."

The demonstration was the climax of a nation-wide gathering of unemployed and the goal was the famous park in the city's heart where the 2,000 marchers, augmented by many thousands of London's unemployed, planned to protest the "means test."

Approximately 5,000 police mounted and about 10,000 were sent to the park for the occasion, demonstrating the fact that never before had Scotland Yard taken such elaborate precautions to deal with a demonstration by the workers.

Fur and motor, wireless equipped, and motorcycle squads kept headquarters in touch with the dozen or more contingents of marchers, as if the whole business were a battle manoeuvre.

A drizzle and chill wind, to which the marchers have long since become accustomed, failed to dampen the ardor of the various columns as they moved in from the rim of London with red flags flying.

British Preference

Ruling Made Regarding Canadian Shipments To Britain Via U.S.

Ottawa, Ont.—Canadian goods being shipped to the United Kingdom will receive the British preference if consigned directly from Canada to Great Britain, whether they pass through the United States or not.

Canadian goods consigned to the United States and then reexported to the United Kingdom will not receive the preference. Premier R. B. Bennett made this explanation of the British tariff regulations in the House of Commons.

British custom commissioners have to have proof that the transit has been uninterrupted before the preference is granted.

Lindbergh's Son Named

New York.—The World-Telegram says that the second son of Col. and Mrs. Charles A. Lindbergh has been named Jon Morrow Lindbergh. The Jon was chosen for a Scandinavian forer of Col. Lindbergh's. Morrow is Mrs. Lindbergh's maiden name.

Cyclone Hits New Zealand

Auckland, N.Z.—A cyclone left a trail of destruction many miles long and about 300 miles wide in the Warkworth district. Buildings were razed, roofs torn off, trees uprooted and general havoc wrought. There were no deaths or serious injuries.

Big Terminal Elevator

Victoria, B.C.—At the rate grain is pouring into the Ogden Point elevator of the Alberta Wheat Pool, the 1,000,000-bushel capacity will soon be filled. There is a total of approximately 250,000 bushels of grain in the elevator at the present time.

Vancouver Grain Shipments

Bringing Back Commerce That Has Been Going To U.S.

Vancouver is winning the grain triumphs, not at the expense of other Canadian ports but in bringing back to "all-red" channels commerce that had been allowed to go to the United States.

As much as 67 per cent of the Canadian wheat crop was once handled by United States, it is pointed out by Robert McKee, president of the Vancouver Merchants exchange, in his presidential survey of foreign trade distributed to members.

But last year only 19 per cent of Canada's wheat harvest, "as Vancouver's exports increased," went through the United States.

The growth of the western route has not been at the expense of eastern Canada ports, their percentage of the wheat movement having remained fairly constant during the past ten years at about 33 per cent and during the crop year just closed they handled an even higher percentage, 37 per cent," said Mr. McKee.

"The grain being shipped through Vancouver has been diverted from United States Atlantic coast ports."

Of wheat alone in the crop year ended July 31, 1932, Vancouver handled 44 per cent, or 760,000,000 bushels of Canada's exports. Eastern Canada ports handled 37 per cent, or 64,000,000, and the United States 33,000,000 or 19 per cent, compared with 67 per cent in 1921.

The outlook for the present year Mr. McKee considers very favorable, with a good possibility of increased volume of shipments owing to the big crop in Alberta, whence comes most of the flow to the Pacific coast.

The prospects of continued improvement in the four trade with China, where Canada has built a large business in the past ten years, are not so satisfactory in Mr. McKee's view. He points to these three main adverse factors:

- (1) Severe competition by Australia, whose exchange position is more favorable.
- (2) Large quantities of flour sold to China by the United States farm board on credit for relief purposes, but which have largely gone to the open market.
- (3) The small percentage of low-grade wheat in the Canadian crop in the past two years. (China hitherto has purchased only a low-grade of flour).

However, says Mr. McKee, Canadian wheat is today cheaper in terms of silver than it was last season.

In the first six months of 1932 four exports to China have amounted to 521,241 barrels. In the whole of 1931 they were 1,058,325 compared with the record year of 1929, when they were 2,809,494.

On the Shores Of Galilee

Historic Stone On Which Christ Stood Believed To Have Been Unearthed

The boulder upon which Christ stood on the shores of the Sea of Galilee to perform the miracle of the loaves and fishes is believed to have been discovered at Tabbata, near Tiberias, Palestine. The stone was found in the centre of a fourth-century church recently uncovered, and is presumed to have been beneath the altar. The church was one of the many built during the reign of Constantine the Great. Behind the stone was found a mosaic panel, depicting in vivid black, red and yellow, a basket, several loaves and two fishes.

In the western half of the church a mosaic floor was uncovered, and is about 15 feet long and 21 feet across. It contains a design of storks and other birds, and is said to be the best-preserved mosaic floor ever found in the Holy Land. Although buried beneath dust and rubble for about 1,600 years, the mosaic shows no signs of erosion.

Man With Two Hearts

Edward Reynolds, 32, of Pittsburgh, possesses two hearts. The discovery came through a swimming accident when Reynolds was 20 years old. A doctor, setting a broken arm, was surprised to find his heart on the right side. Later an X-ray showed he had another heart, although much smaller, on the left side.

A dentist advertises that he will accept his pay in chickens. This is called reciprocity; you fill my cavity and I'll fill yours.

The coldest town on the British Isles is Braemar, which has an average yearly temperature of 11.3 degrees above zero.

W. N. H. 1936

Planning Further Use For London Mansion

St. Dunstan's May Become International Hostel For Children

St. Dunstan's, the famous London mansion which has been empty for four years since it ceased to be the headquarters of the movement for training war-blinded soldiers, may be converted into an international hostel for children. If the scheme matures children from all over the United Kingdom, the empire and Europe will gather at the mansion for a stay of a week or two to study and visit places and things of interest in London, and Regent's Park may become the greatest "children's park" in Europe.

The School Young Association, a voluntary body of 4,000 teachers, whose vice-president is Lord Burnham, and who arrange in their spare time educational holidays for more than 50,000 school children a year, is sponsoring the equipment of the mansion. A third of the sum required to convert the building into a hostel has already been subscribed, mostly by the teachers of the United Kingdom themselves, and as soon as the necessary fund can be completed the work will be begun.

An official said it is intended to accommodate 120 children a night, and to have as a feature a good travel library of guide books, maps and charts. The office of works is doing its best to forward the scheme, and the treasury has fixed a purely nominal rent of \$300 for the mansion.

St. Dunstan's was built by permission of Queen Victoria on crown property in Regent's Park. It was at first known as St. John's Lodge, and was a home of Lord Bute. It was converted into a military hospital in 1914, and at the close of the war became the headquarters of Arthur Pearson's organization for training blinded soldiers.

Marley Says Canada Experienced Nation

Youth Over-Emphasized Declares Canadian Minister To Japan

"Canada is often spoken of as a young country; in my opinion our youth is over-emphasized," Hon. H. Marley, Canadian Minister to Japan, said at Vancouver in an address at the University of British Columbia, where the honorary degree of LL.D. was conferred on him.

"We are not really a young country, nor are we wanting in experience," he said. "Have we not out of our diverse elements solved the problems of self-government? Have we not welded together an Empire stretching from Atlantic to Pacific? Have we not achieved fifth place among the trading nations of the world?"

"Few nations that are called 'old' are able to say as much. If we ponder over this we should realize we are not young, but an experienced nation, quite capable of conducting our own affairs in foreign lands."

Mr. Marley made these remarks in an appeal to Canadians to be awake to their opportunities for foreign trade and its necessity to the life of the nation.

A Good Bird Story

Large Flock Caught-In Tar Spread On Roadway

One day last summer, while a gang of workmen were laying a pavement near Tiffin, Ohio, they spread a section of the road with liberal quantities of tar as an adhesive.

While the crew was working at another point, a large flock of migrating birds swooped down, settled on the fresh roadway and got stuck in the tar, making the road look like a gigantic strip of flypaper. The local State game warden was called, and aided by the workmen, he succeeded in extricating approximately 500 birds. Many had accumulated so much tar in their struggles that they were unable to fly, even after being liberated.

One Peculiarity

History was the subject of the morning lesson in the boys' school.

"Tommy White," said teacher, "tell the class what you know of the peculiarities of the Quakers."

"The boy got fatteringly to his feet, but no word came from his lips. "How does their way of speaking differ from yours and mine?" the teacher put in coaxingly.

"Well, sir," said Tommy, "they don't swear."

The world's population in 1927 was estimated at 1,960,000,000 by the League of Nations.

War gas marks are being sold in Koenigsberg, Germany, at 25 cents each.

GREETING A "FORGOTTEN MAN"

Governor Franklin D. Roosevelt is shown as he talked with a mine worker as he passed through West Virginia coal district en route to Wheeling, where he delivered a campaign speech. The Democratic candidate discussed the labor situation with the miner, who answered in broken English that he worked six days for six dollars.

Punishment Was Just

Woman Fined For Mailing Letter Bearing Previously Used Stamp

That ironic form of punishment known as poetic justice was so completely visited upon a British woman of late that all the world should hear about it. The woman, described by the London Morning Post as well-to-do, handed into a post office a letter bearing a three-halfpenny stamp which had been previously used. For doing this she was brought before the magistrates fined 25s and ordered to pay costs to the amount of \$t. 7s.

Evidence produced before the magistrate was that the letter was to a betting commissioner, placing bets on horses which won and which would have yielded a profit of more than \$22. The letter was not delivered; the bets were not placed; the profit was not made. All for lack of a three-halfpenny stamp.

Farming Is a Business

And Should Be Organized On a Business Basis

Here is what Dr. J. Coke, Assistant Director of Agricultural Economics, Ottawa, has to say about the farmer in national economy writing in the current issue of the Economic Annalist:

"The modern farmer is an entrepreneur—an owner and organizer of a business in which he and members of his family perform a good deal of the manual work connected with the enterprise. He buys and sells commodities. He employs labour and directs it. He seeks an income which will enable a satisfactory standard of living. It may be well, therefore, for all those interested in agriculture to bear in mind that farming will be a better way of getting a living when it is organized on a business basis.

Polite Irony

It was a long play, and was being shown at the village hall. The curtain was rung up on the fourth act, disclosing an actor sitting wearily at a table. All was stillness; he had not spoken. At last a member of the audience ventured to express the sentiments of the house.

"I hope we are not keeping you up, sir," he suggested kindly.

Landlady: "So Mr. Newboard has found something fresh to complain about this morning."

Maid: "No, mum, it's the eggs."

Apple Belt Moves North

Standard Apples Grown Successfully At Beaver Lodge, Alberta

That Canada's apple-growing belt is moving northward is shown by the fact that standard apples have been grown this year at the Dominion Experimental Farm at Beaver Lodge, Alberta, which is 428 miles north of the international boundary between Canada and the United States. Crab-apples and small seedlings have been known to ripen further north but not standard apples. A new market for Canadian apples has started this year with the first shipment of more than 750 boxes from British Columbia to South Africa. The fruit left the Western province in a refrigerator car travelling by way of Montreal to Cape Town—Department of Agriculture, Ottawa.

Bacon Hogs

Possibilities Of Swine Production In Canada Not Fully Explored

Some interesting facts about the production of bacon hogs in Canada are outlined by G. B. Rothwell, Dominion Live Stock Commissioner, on a recent occasion when he asserted that the possibilities of pig production in Canada have never been fully explored. In developing the export market the building up of a consistent volume is equally important with maintaining the right quality. While there are certain climatic limitations to bacon production in Canada, these are more than offset by the range in quality of feeds available.

Where Dobbin Scores

In meek content he stands Beside the pasture bars. Or grazes on the grass; And now and then he lifts his head, As if in speculation, And gazes on the speeding cars that pass:

Then in a sudden burst of elation, He makes a leap, and starts To run in coltish glee, Kicking his heels:

For doesn't he, though old, Still carry all his bones in natural relation!

While over on the old scrap heap All unasssembled lie, In ignominious parts And deep humiliation, Automobiles.

—Magdalene G. Clark.

Gave Him No Thrill

Aviator Describes Attack On World's Altitude Record As Boring

Men who accomplish great things generally belittle their achievements, or at least refrain from showing any of the excitement that mere bystanders show. Captain Cyril Uwins, is no exception to the rule. The Captain was asked to describe his sensation while flying in the stratosphere more than eight and half miles above the earth, at Bristol, England, recently and replied with two words, "inaudibly boring." Captain Uwins' feat was his attack on the world's altitude record in a Vickers "Vespa" airplane fitted with a Bristol "Fogarus" engine and, despite the coolness with which Captain Uwins regarded the entire proceeding, the flight was one of the greatest in aeronautical history. It was the more dramatic because the elaborate preparations, occupying many months, had been kept a closely guarded secret. It was only when the officials of the Royal Aero Club were hastily summoned from London to Bristol to observe the flight that the facts became generally known.

Captain Uwins climbed for about two hours in the "Vespa." The whole time he was fed with oxygen and his clothes and even his goggles were electrically heated. At 45,000 feet, the height recorded by the instruments, no man could have lived for two hours without these appliances for the thermometer registered more than 100 degrees of frost and the air was so thin that death from oxygen want would have followed if the artificial supply had failed. Captain Uwins, who was well known for his achievement that anyone else, stated after he had descended that he would have gone on climbing and believed that the airplane could have gone higher except that the petrol supply was coming to an end. Before this flight, on two or three occasions he had flown at more than 40,000 feet to test the machine and engine.

According to his instruments Captain Uwins exceeded by an adequate margin the world's altitude record; but before official confirmation of a new record is possible the sealed barographs carried on the flight have to be inspected and tested by the National Physical Laboratory and their readings have then to be corrected for atmospheric pressure and density. —St. Thomas Times-Journal.

"Hope Springs Eternal"

Indispensable To Humanity, But Often It Is the Author Of Tragedy

One of the strangest quirks of human nature is the hope which "springs eternal" in the human breast." It is the mysterious little thing which sends the soldier into the thick of the fray, confident that he will come out alive and unscathed. It is the ineffable something which permits man to live happily unmindful of inevitable death. It is the optimistic, omnipresent companion of man through the vicissitudes of life. Without it life would be unbearable to the multitudes.

But while hope is indispensable to humanity it not infrequently becomes the author of tragedies. After sometimes a full field of happiness hope sowing sometimes harvests a bumper crop of sorrow and misfortune. There is an adage that "man cannot live on hope alone." Those who try it usually suffer only disillusionment or starvation. Hope is responsible for a great deal of human improvidence.

Some of those who overwork hope are the workmen who, hopeful of continuous employment and high wages, preserves none of his earnings; the husband and father who, hopeful of dying at an independent old age, fails to give his family and himself the protection of life insurance; the property owner who hopeful of never having a fire, places no fire insurance on his property; and the man who, hopeful of permanent good health, neglects to preserve his health. —St. Catharines Standard.

Candidate—I suppose in this campaign the proper thing for me to do is to stand on my record.

Political Boss—No; to jump on the other fellow's.

Political Speaker—I am exceedingly pleased to see such a dense crowd gathered here tonight.

Voice—Don't be so pleased. We ain't all dense.

"Let me see," said the smart girl, "was it you or your brother who used to be one of my admirers?"

"Probably my father," replied the once-rejected suitor.

Boy: "I want some rope like this."

Shopkeeper—"How much?"

"Why, enough to reach from the goat to the fence?"

Machine Not Infallible

Inventor Of "Lie Detector" Admits It Sometimes Errs

Dr. John A. Larson, the "only Ph. D. cop in the world," has written a book in which he admits that the lie detector of his invention is fallible. No man should be sent to jail nor should any suspect be released from custody, solely on the evidence of the lie detector, according to Dr. Larson, who is an assistant state criminologist.

The machine, he wrote, is inaccurate in so far as the human interpretations of its records may be faulty. The percentage of error is from 5 to 25 per cent.

Dr. Larson invented the lie detector while serving as a policeman under Chief August Volmer in Berkeley, California, in 1921. It consists of a cuff which is placed about the upper arm to register blood pressure, and of a tube about the chest to measure respiration.

The blood pressure and respiration of the suspect under questioning are recorded on a cylinder of paper driven by a synchronized motor. The variances at the time the subject answers key questions determine whether he is telling the truth.

Dr. Larson, who has used his device continuously for eleven years in criminal cases, said its greatest value lies in protection of the innocent. The real merit of the machine, in his opinion, is that it "gets at the truth" without "third degree" methods.

In eleven years the criminologist reported finding only seven persons who lied without being "detected." These cases were of mental defects, psychoses, and drug addicts. Of hundreds of suspects, seven refused to take the test on advice of counsel and later were found guilty.

Dr. Larson wrote:

"The lie detector does not get false confessions because there is no pain and nothing to inspire fear but a guilty conscience. Put a rat in a cell of a nervous woman and she will confess to anything. Hit a weakling in the stomach with a Billy after every question, and the same result will be gained."

Dr. Larson's book, just released by the University of Chicago Press, is entitled "Lying and Its Detection."

Centre Of Lloyd's Business

Whole Fabric Of Firm Revolves Around The Room

Philip Jordan writing in the Fortnightly Review, says:

"The main business of Lloyd's—which is underwriting insurance risks—is carried on in the Room. Around the room is constructed and revolves the whole fabric of Lloyd's. In practice, as in spirit, the Room is the centre of the building.

Admission to the Room is granted only to those who, in one way or another, subscribe to Lloyd's. No stranger may enter the bronze gates that bar it from the world outside, unless accompanied by one who has the entree. In this respect Lloyd's differs from the London Stock Exchange, into which no stranger may ever penetrate.

Over all the Room hangs the famous Lutine bell, itself an institution that is as well known as Lloyd's itself. It is rung when there is news of importance to be communicated to the underwriters who work beneath it, as it hangs on the Rodrum, above the caller's head. It is rung when royalty or other distinguished visitors appear in Lloyd's. When a ship is lost, the bell is tolled."

Chickens Traveled By Plane

Seventy Hens Taken By Aeroplane To The Far North

Hens are poor air travellers, W. A. Spencer, aviator from the Great Bear Lake district, stated on arriving in Winnipeg by aeroplane from the north. He carried 70 birds to the Island Lake district some time ago, giving children of that locality their first view of tame chickens. The fowls recovered from severe cases of air sickness, and their eggs are selling for a dollar a dozen.

An early winter was predicted by Mrs. Spencer, because "I had seen it in two weeks earlier than usual in the north."

"Does the foreman know the trench has fallen in?" asked the master of works.

"Well, sir," replied the navy, "we be digging him out to 'gill him."

Arab laborers under the supervision of British constables recently moved \$4,500,000 from the Palestine treasury to Barclay's Bank, Jerusalem.

Annual Bazaar November 26th.
The Womens Guild are holding their annual bazaar on November 26th in the U. F. A. Hall. Will also serve tea and sell home cooking.
They have some very nice fancy work and it would be worth your while to have a few Xmas gifts ready, so come along and see what they have at reasonable prices.

TRUCKY SHOOT NOVEMBER 11th.

The Crossfield Baseball Club is planning to hold a trucky shoot Friday, November 11th. R. M. McCool will have charge of the event. It will be a big day for sportsmen of the district.

Order your Christmas cards at the Chronicle office.

RECORD YIELDS
We have reported on different occasions the outstanding yields harvested in the Crossfield district this year, but one of readers blamed these accounts for the low price of grain, so we eased off. However here's another one:
A. A. Harnaack got 1050 bushels of Abundance oats from 10 acres
WHEAT
Crossfield, Thursday, Nov. 3.
No. 1 Northern 27c.
An all-time record low price for wheat was set on Tuesday when the price dropped to 25 1-2c a bus.

A well attended meeting of the Ladies Aid was held at the home of Mrs. J. Belahav on Wednesday. On Friday evening in the United Church Rev. Jesse Arup of Toronto, Secretary of Foreign Missions will give an address.

Mrs. R. T. Amery was a recent winner of a prize in connection with the Capital Theatre radio contest.

Mr. and Mrs. R. M. McCool attended the U. F. W. A. masquerade dance at Carstairs on Monday night. Mrs. McCool acted as one of the judges.

George Becker well-known old-timer of the Crossfield district, and now a resident of Black Diamond, will celebrate his sixty-first birthday on Nov. 9. Mr. Becker came west to Calgary in 1899, and to Crossfield in the fall of 1902.

Dances will be held in the Carstairs Hall every Saturday night from 9 until 12. Admission 30c each, tax included. Music by the BELLAMY Orchestra.

LOCAL NEWS
Mayor Williams was a business visitor in Calgary on Tuesday.
Hick McFadyen of Edmonton spent the week-end in town.
Norman Johnson is painting the interior of his barber shop.
H. E. G. H. Schofield of Edmonton was a week-end visitor in town.
BORN—To Mr. and Mrs. A. G. Harnaack, on Oct. 27, a son.
BORN—To Mr. and Mrs. Sinclair, Crossfield, at the Mrs. Collins Nursing Home on Oct. 30th, a daughter.
Art Heywood and Hans Olson left on Saturday on a big game hunt west of Crossfield.

R. T. Amery sold seven head of work horses to a buyer from Nova Scotia on Friday. The price paid was \$100 a head. Good quality large size writing pads (150 sheets) for sale at Chronicle Office—35c each.

Don't forget the Remembrance Day Service in the United Church at 10.45 a.m. Friday, Nov. 11th. Everybody welcome.

Geo. Leask of Madden had 40 acres of rye that went 60 bushels to the acre. His barley made 60 bushels and oats 65 bushels to the acre.
A horse belonging to Capt. Wigle dropped dead in the C. P. R. yards on Friday. The team was hauling a load of coal at the time.

Charlie Brown well-known locally, who recently died from injuries received in an accident at Turner Valley, was buried at Sundrie on Saturday.

Hans Patmore, Bud Plumb, Mrs. Vince Patmore and Mrs. Mel English, were among those from Crossfield who attended the U. F. W. A. masquerade dance at Carstairs on Monday night.

A gang of twenty-six men employed by the Calgary Power Co. arrived here on Monday and are stopping at the Oliver Hotel. They are making alterations to the power line west of town.

George Donald, son of Mr. and Mrs. Ed. Donald, met with a painful accident on Saturday morning, while cranking their car it back fired, causing a partial dislocation to his wrist.

Vergil Green had the misfortune to break his right leg in two places on Saturday morning. He was helping take the trucks from under a bunk car when the accident happened.

The members of the J. W. A. and their friends had a very enjoyable Halloween party at the Rectory on Monday evening. The usual spooky stories were told, songs and games. First prize for the guessing contest was won by Eileen Arrott; second prize, Irene Sefton. After refreshments were served, the children returned their way home, all happy.

Hallowe'en has come and gone, and the usual number of backaches were turned over, and some four of them decorated the Main Street on Wednesday morning. (ates were removed and windows soaped, but very little damage to property is reported. Although a number of windows in the Culling Rink were broken during the night. It is expected that the guilty youngsters will be found out and their parents called to foot the bill.

There is young lad east of town who will tell you that Guy Wickerson can run and run plenty. Mr. Wickerson noticed a young fellow out at his barn on Hallowe'en and he went out to investigate. The boy was off like a shot before he could get near him, but Mr. Wickerson did not give up; he set out after him and was gaining on him in leaps and bounds, and no doubt had visions of a nice round place where he was going to plant a good sized shoe, when bang—Guy stubbed his toe and the chase was over.

I SAW
A. G. Harnaack wearing a big smile with the arrival of a new son at his house. N. A. Johnson moving his stock from his old location to his new premises on main street in a wheelbarrow.
Honest John hitting for the coaling station.

Archie McFadyen wearing a new pair of fancy overshoes. Tough on Donnie. Dr. Whillans and R. M. McCool expounding on the advantages of Socialism, and the cancellation of debts.

Chris Asmusen carrying his own cards and looking for some one to play his favorite game of sixty-six.

If you want to know all about the proposed new Municipal Districts, attend the public meeting in the U. F. A. Hall on Tuesday afternoon.

There has been no threshing done since the snow storm on Thursday of last week and with another light flurry on Wednesday, it is doubtful if any threshing will be done for another ten days.

Good cash prizes are being offered in the "Wildfire Double Money" Contest. It costs nothing to enter, and you may be numbered amongst the lucky ones—See the Atlas Lumber ad. in this issue.

The Floral Local U. F. W. A. will hold their November meeting at the home of Mrs. R. M. McCool on Wednesday 9th. Roll Call—A Christmas Recipe.

**GOVERNMENT OF THE
DOMINION OF CANADA**

4% LOAN—1932

The Minister of Finance offers for public subscription

\$80,000,000

Dominion of Canada 4% Bonds

Bearing interest from 15th October, 1932, and offered in two maturities, as follows:

\$25,000,000— 3 YEAR 4% BONDS, DUE 15th OCTOBER, 1935
\$55,000,000—20 YEAR 4% BONDS, DUE 15th OCTOBER, 1952

Subject to redemption at par and interest on or after 15th October, 1947

Principal payable without charge, in lawful money of Canada, at the office of the Minister of Finance and Receiver General of Canada at Ottawa or at the office of the Assistant Receiver General at Halifax, Saint John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any Chartered Bank.

Denominations:
3 YEAR BONDS, \$1,000
20 YEAR BONDS, \$500 AND \$1,000

The proceeds of this Loan will be used to retire \$34,449,950 of bonds maturing 1st November, 1932, and to provide for the general purposes of the Government and the Canadian National Railways.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The amount of this issue is \$80,000,000. The Minister of Finance, however, reserves the right to allot or reject the whole or any part of subscriptions received, provided such allotments do not increase the principal amount of the issue by more than \$25,000,000.

Applications will not be valid on forms other than those printed by the King's Printer.

ISSUE PRICE: 3 Year Bonds, 99.20 and interest, yielding to maturity 4.28%
20 Year Bonds, 93.45 and interest, yielding to maturity 4.50%

Payment to be made in full at time of application or in the case of the 3-year bonds, on allotment.

Subscription lists will open on 31st October, 1932, and will close on or before 16th November, 1932, with or without notice, at the discretion of the Minister of Finance. Subscriptions will be received by any branch, in Canada of any chartered bank and by recognized dealers from whom official application forms may be obtained.

**DEPARTMENT OF FINANCE,
Ottawa, 31st October, 1932**
